Policy Statement

The College of Charleston shall employ sound, standard practices for determining the amount and level of credit awarded for courses, regardless of format, location, or mode of delivery.

The College of Charleston complies with the definition of credit hour supplied by the South Carolina Commission on Higher Education:

**CREDIT HOUR** A unit of measure that represents the equivalent of an hour (50 minutes) of instruction that can be applied to the total number of hours needed for completing the requirements of a degree, diploma, certificate or other formal award.

Consistent with the federal definition of a credit hour at 34 CFR 600.2, the College of Charleston defines a credit hour as

an amount of work represented in intended learning outcomes and verified by evidence of student achievement that is an institutionally established equivalency that reasonably approximates not less than:

1. One hour of classroom or direct faculty instruction and a minimum of two hours of out-of-class student work each week for approximately fifteen weeks for one semester . . . hour . . . or the equivalent amount of work over a different amount of time; or
2. At least an equivalent amount of work as required in paragraph (1) of this definition for other academic activities as established by the institution, including laboratory work, internships, practica, studio work, and other academic work leading to the award of credit hours.¹

At the College of Charleston, the process of creating a new course begins in the academic department or program. The academic department or program determines the amount and level of credit to be awarded for the course and assigns a course number (see

College Policy 7.6.9, "Course Numbering Policy") consistent with that policy and with
disciplinary norms and best practices related to student learning outcomes. In assigning
credit, the requirement is that, for every one (1) hour in class, students will have a
minimum of two (2) hours of additional academic work beyond the class time (e.g.,
completion of term papers, problem sets, reading assignments); therefore, for every
semester credit hour awarded, a total of at least three (3) hours per week for each week of
the term is required. Each department (or program) and school must account for the
nuances and requirements of the particular field(s) of study in meeting these minimum
expectations. Credit is assigned to a course on this basis without regard to mode of
delivery.

The department or program completes a formal proposal for a new course or a revised
course. The proposal is reviewed and approved by: department or program faculty, the
Department Chair or Program Director, Dean(s) of the School(s), the Provost and
Executive Vice President for Academic Affairs (hereafter, "Provost"), the Faculty
Curriculum Committee or Committee on Graduate Education, and the Faculty Senate.

Fall and spring semester courses are scheduled for 15 weeks, excluding holidays,
spring/fall break but including a week of final examinations, resulting in roughly 14 weeks
of class meetings and one week of final examinations or, for example, 2100 minutes of
instruction for three-credit courses. With the exception of online courses and certain
course offerings not entirely dependent on traditional, face-to-face instructional modalities,
as described elsewhere in this Policy, courses must follow the minimum guideline of 700
minutes of instruction per credit hour. For the purposes of this Policy in calculating
minutes of instructional time, final examination periods are not counted in those minutes.

Online courses and certain course offerings not entirely dependent on traditional, face-to-
face instructional modalities must reasonably approximate the minimum guideline of 700
minutes of instruction per credit hour, consistent with the federal definition of a credit hour.

With the approval of the School Dean and the Provost, the Department of Studio Art
adheres to a four-hour block schedule for studio courses, with 60 minutes per hour for
such courses. Typically, studio art courses meet one (1) time per week for four (4) hours
over the course of a fall or spring semester. Thus, one (1) credit of a studio course will
align with 80 minutes per week of studio instructional time.

One-credit-hour laboratories associated with natural science courses meet one (1) time
per week for 180 minutes each, with any variance to be justified by the relevant faculty
supervisor and approved in writing by the School Dean and the Provost. The approval of
any variance shall require a demonstration that the relevant laboratory course shall
reasonably approximate the institutional expectation for 180 minutes of meeting time per
week.

For courses that meet on the downtown campus or at any other approved institutional site
during the fall and spring semesters, the College of Charleston provides the following
approved meeting pattern time guidelines to ensure that the minimum instruction-time
requirements are followed:
- Three-credit hour daytime courses that meet three (3) days per week meet for 50 minutes per class session. These courses meet for 42 sessions per term.
- Three-credit hour daytime courses that meet two (2) days per week meet for 75 minutes per class session. They meet for 28 sessions per term.
- Fall or spring evening courses may meet one (1) or two (2) nights per week. The total number of meeting minutes per semester is used in the calculation of the total length of each class meeting for evening courses (2100 minutes for a three-credit course).

Meeting patterns are adjusted appropriately for one-, two-, and four-credit courses. Any variance on this meeting pattern must be justified by the relevant faculty supervisor and approved in writing by the School Dean and the Provost. The approval of any variance shall require a demonstration that the relevant meeting pattern shall reasonably approximate the institutional expectation for 700 minutes of instruction per credit hour.

Within the fall and spring semesters, Express I and Express II sessions constitute half-semester accelerated terms. Courses meet twice a week for 150 minutes per meeting for seven (7) weeks and one (1) additional day assigned for final exams in each session. Any variance on this meeting pattern must be justified by the relevant faculty supervisor and approved in writing by the School Dean and the Provost. The approval of any variance shall require a demonstration that the relevant meeting pattern shall reasonably approximate the institutional expectation for 700 minutes of instruction per credit hour.

The College of Charleston has five (5) sessions during the summer term. The number of course meetings per session and the number of days for each session vary slightly from one summer term to another. The scheduling pattern adopted for courses offered during the summer term must comply with the minimum guideline for minutes of instruction per credit hour, consistent with the current Policy and with the scheduling pattern subject to the review and determination of the Provost. The following scheduling pattern is typical for a summer term:

- The Maymester session is a two-week session during which courses meet five (5) days per week for three and one-half hours (210 minutes) per day for a total of 10 class meetings per session.
- Extended Summer is a six-week session during which courses meet two evenings per week for three and one-quarter hours (185 minutes) per meeting for a total of 11 class meetings per session.
- The Summer I and Summer II sessions are each four (4) weeks in duration, during which courses meet five (5) days per week. Courses are scheduled for 105 minutes per meeting for a total of 20-21 meetings.

Though the schedule for the summer sessions courses is compressed, the total number of instructional hours remains the same as the total number of fall and spring instructional hours, and the course credits remain the same.

For courses designed to include significant out-of-class experiences (e.g., student
teaching, internships) and Independent Studies, Tutorials, and Bachelor's Essays, guidelines are set by the academic department or program for how the instructional time frame will meet credit guidelines outlined above. These courses require individual enrollment accompanied by a detailed contract specifying the nature of the student work product, learning outcomes, the frequency of meetings between the faculty member and student, and the method of final evaluation (grading).

For online courses (defined for purposes of this Policy as 75% or more of instruction delivered entirely online), "academic engagement" is the equivalent of "class time" in a face-to-face course. In assigning credit, the assumption is that for every one (1) hour of online academic engagement, students will have a minimum of two (2) hours of additional academic work and preparation beyond the instructional time. Therefore, it is expected that for every semester credit hour given, a total of at least three (3) hours per week for each week of the term is required. Academic engagement may include, but is not limited to, submitting an academic assignment, listening to class lectures or webinars (synchronous or asynchronous), taking an exam, completing an interactive tutorial or computer-assisted instruction, attending a study group that is assigned by the institution, contributing to an academic online discussion, initiating contact with a faculty member to ask a question about the academic subject studied in the course, conducting laboratory work, and completing an externship or internship. Academic work and preparation is typically homework, such as reading and study time, and completing assignments and projects.

College of Charleston courses delivered using hybrid or blended models of instruction must be consistent with the expectations for academic engagement and instructional time articulated in this Policy.

College of Charleston courses delivered abroad or at other off-campus settings are developed by faculty to take full advantage of the unique location and must be consistent with the expectations for academic engagement and instructional time articulated in this Policy.

Academic units shall ensure that credit hours are awarded consistent with the requirements of this Policy.

Direct-assessment competency-based educational programs have been recognized by the Federal Government and by the regional accreditors, where such programs do not fit into traditional models in which academic progress and student learning are measured using clock or credit hours. In the event such a program or such programs are ever approved by the College of Charleston, the College of Charleston shall comply with the policy guidance for such programs provided by its regional accreditor, the Southern Association of Colleges and Schools Commission on Colleges.

This Policy does not apply to non-credit-bearing instruction at the College of Charleston.

Under extraordinary circumstances following a weather-related or other emergency closure of a College of Charleston instructional facility and/or suspension of instructional
activities, the Provost, subject to the review and determination of the President of the College, may allow for academic engagement to substitute for some or all of the minutes of instructional time lost because of the campus closure or lost instructional activities. The Provost’s rationale for and decision regarding such substitutions shall be timely communicated in writing to the President of the College.

Policy Manager and Responsible Department or Office

Provost and Executive Vice President of Academic Affairs (or Provost’s designee)

Purpose/Reason for the Policy

Academic credit provides the basis for measuring the amount of engaged learning time expected of a typical student enrolled in academic courses. Students, institutions, employers, and others rely on the common currency of academic credit to support a wide range of activities, including the transfer of students from one institution to another. The federal government relies on credits as a measure of student academic engagement as a basis of awarding financial aid.

Departments/Offices Affected by the Policy

Office of the President
Academic Affairs (Academic Schools, Departments, and Programs; Registrar’s Office; Summer School)
Enrollment Planning (Financial Aid)
Business Affairs (Treasurer)
Office of Institutional Effectiveness and Strategic Planning
Procedures Related to the Policy

Faculty in Academic Programs and Departments, Department Chairs and Program Directors, Deans, appropriate faculty committees, and the Provost’s Office review the amount and level of credit as new courses are proposed or significant changes are made to courses using the approved process of curriculum review at the institution.

The Registrar ensures that course schedules are consistent with the clock-to-credit formula outlined in this policy by utilizing an approved meeting schedule.
